Eneko Llanos targets Xterra's crown to close the season

Eneko Llanos has reached the final section of the 2010 season. Following his seventh place in the Ironman Hawaii on October 9, the BH-sponsored triathlete and reigning Xterra World Champion will fight this Sunday, October 24, to retain the title he got last year in Maui.

Athletes hailing from 20 different countries are coming to the spiritual birthplace of Xterra and head for Maluaka beach before 9 a.m. After the 0.93mi/1.5km swim, Eneko will ride his BH Trail Racer Carbon Full Suspension to cover the tough 20mi/32km course going up, down and up again 1,400ft/425m and a final 5mi/8km section called "the plunge" back to sea level, across steep paths featuring gravel and rocks. Then there is the beautiful end run along 6.8mi/11km of wonderful landscapes in the Hawaiian island.

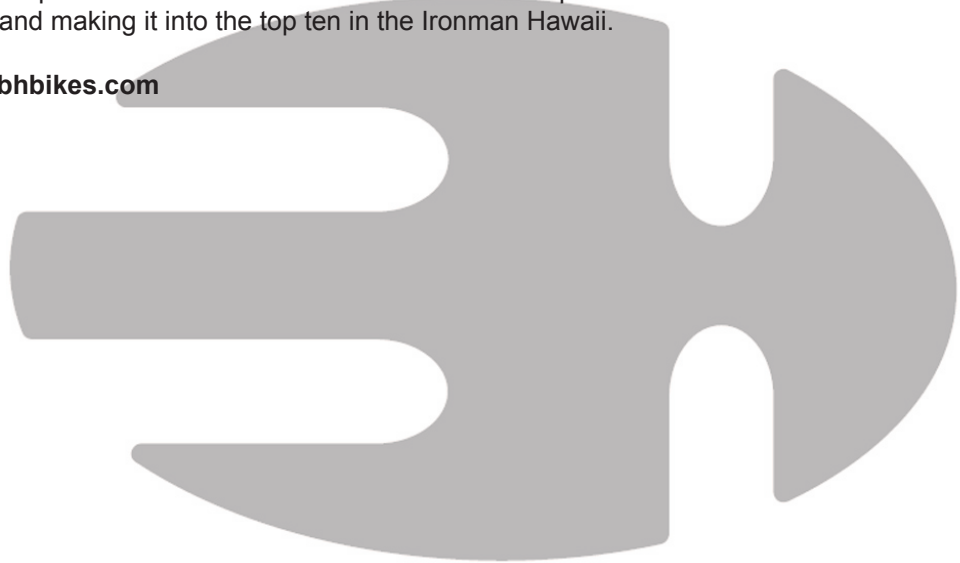

Maui is a gift for some and a good chance for others, since even those who have had not so good a season can recover and win the coveted Xterra World Champion title. Eneko Llanos won it last year and will fight to keep it this year.

"I'll try to fight for the title"

The triathlete from Álava is checking in at the Xterra not knowing whether he is well-trained for the trial or not, because he cannot train specifically for this event. "Last year, it was perfect after a bad performance in the Ironman, and this year I don't know, anything can happen. But what I do know is that if I can fight for the title, I will," Eneko said a few days ago, before the Ironman Hawaii.

Eneko's season has been great so far, and thanks to his impressive results, everybody sees him as an Xterra favourite. Competing in eight events, he has taken five first places, one second, and two third spots. His latest achievements were the first place in the ICAN Triathlon in Majorca and making it into the top ten in the Ironman Hawaii.
